i-3<sup>®</sup> Lighting Control Technology V2

# Energy savings with Lighting Controls

## i-3 - installation, integration, interface

Let Siemens i-3 Lighting Control Technology V2 make saving electrical energy simple. Siemens innovative i-3 Lighting Control Technology V2 is easy to use, easy to commission, easy to maintain, and easy to expand.

Based on our standard P1 Lighting panel design, i-3 Lighting Control Technology V2 uses standard Siemens BQD circuit breakers and controlled SIPODs to turn circuits ON and OFF. This provides industry leading reliability over controlled breaker solutions.

**Setting standards with Totally Integrated Power.**
